STOP-PICK

DIN 00097411

Indications:

For use on chicks, poults, and all fowl to stop picking and to prevent cannibalism.

Dosage & Administration:

It is important that Stop-Pick be used at the first indication of picking before the habit becomes firmly established.

To prevent the outbreak of cannibalism, apply on 15 to 20 birds in each 100 at the first sign of picking.

To start the healing process, apply over sores on birds already picked.

Stop-Pick is repulsive to fowl, yet harmless and effective.

Contains:

Aloes, Gentian, Cayenne Pepper, Juniper Tar, in a Petroleum Base.

Presentation/Packing:

115 mL bottle; 12 bottles/carton (Liquid)

100 gram jar; 12 jars/carton (Ointment)
