PRODUCT INFO

TOPAZ INDUSTRO

FLOAT VALVE

Description

Topaz Industro Float Valves are designed to maintain water levels in applications requiring a valve with high mechanical strength and heat resistance. Some typical applications would be refilling cooling towers and storage tanks, high pressure cleaning and car wash systems as well as many light industrial, air conditioning and irrigation installations.

Applications

Maintaining Water Levels in:

- Car Wash systems
- Water Storage Tanks
- Water Cisterns
- Air Conditioning Systems
- High Pressure Cleaning Systems
- Irrigation Applications

Flow Graph

Features

- High flow
- Compact robust construction
- Maximum water temperature 80°C / 176°F
- Made from approved materials
- Mounts horizontally or vertically
- Made from corrosion resistant materials
- Shuts down slowly to minimise water hammer
- 20 - 60mm (3/4" - 2 1/2") water level differential (increases as water inlet pressure increases)
- Pressure rating 0.3 - 7 Bar (5 - 100 PSI)
- Float position easily adjustable with no tools
- Valve has switch to lock it in off position
- Has port to connect Frostpro anti freeze device
